DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claims 1-17 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In claims 1,7,11,15 and 17, properties of an encoder are claims as follows: **all k input symbols and all $m-k$ other output symbols are determinable from any k output symbols, and no $m-l$ other output symbols are determinable from any l output symbols, $l < k$.** These properties are recited in Applicants abstract and also in a summary of the invention (see page 2, lines 4-7). The claim language is merely recited both places. Further the code is described as a Maximum Distance Separable (MDS) code. The detailed description further describes decoding stages and all of the properties of the MDS code; however, it is not clear how the claimed properties are concluded.
